Experience

2024 –
Cloud Architect, IF Insurance
Defining and creating the data hub for a new auto insurance product.

2024 – 2024
Cloud Architect, Vattenfall
Led the development of automated data processes in Azure for a fast-moving data platform. Directed the migration of internal data products and oversaw the Databricks Unity Catalog implementation to ensure efficient data governance and management.

2023 – 2024
Tech Lead Data Engineering, Inter IKEA
Managed a data engineering team to design and implement an Azure-based platform, automating data flows for scalable analytics. Led the transition of legacy products to the new platform, ensuring smooth execution of the Databricks Unity Catalog for data organization.

2021 – 2023
Cloud Architect / Team Lead, Svenska Handelsbanken
Pioneered the setup of the bank's data and analytics environment on Azure. Defined data flows and infrastructure, contributing to the development of a metadata and data quality platform that enabled accurate information management and improved data-driven decision-making.

2017 – 2021
Data Engineer / Cloud Architect / Team Lead, Inter IKEA
Headed the analytics team to establish a scalable analytics platform. Directed the integration of Azure Data Lake and Databricks Spark clusters to enable machine learning and advanced analytics at scale, ensuring seamless data ingestion via Data Factory.

2016 – 2017
BI Specialist / Data Analyst, Inter IKEA
Spearheaded a major data warehouse restructuring project, leading a team through improved automation and efficiency efforts. Supported ETL processes and provided actionable insights through advanced data analysis.

2008 – 2016
BI Infrastructure Architect, IKEA Group
Played multiple roles in IKEA's Business Intelligence team, including solution architect and team lead. Enhanced BI operations by optimizing infrastructure and streamlining data processes, enabling better reporting and analytics for business stakeholders.

2013 – 2013
Infrastructure Architect, Ikano Bank
Led the technical migration of an Oracle-based solution to a new data center, coordinating both the strategic and hands-on aspects of the move.

2006 – 2008
Application Database Administrator, Telia Company
Optimized large-scale data flows and improved query performance for critical applications. Developed an incident management framework, enhancing system reliability.

2003 – 2006
Database Administrator, National Courts Administration
Maintained and optimized operational databases and BI systems, automating workflows to reduce manual effort and improve data accuracy.

2001 – 2003
Database Administrator BI, National Social Insurance Agency
Administered Oracle-based data warehouses, enhancing system performance to support large-scale analytics with SAS.

1995 – 2001
Various Roles: Developer, Network Technician, Webmaster
Held technical roles across development, network infrastructure, and web management, gaining a broad foundation in IT operations.

Companies

2007 –
Owner, Ubåt AB
IT consultancy company. Self employment.

2019 – 2024
CEO, Owner, The Honest Box of Sweden AB
Technology for unmanned retailing.

2008 – 2015
Owner, Mandelkubb Media AB
Freelance writing company. Self employment.

Certifications
